

Aula Nº 2

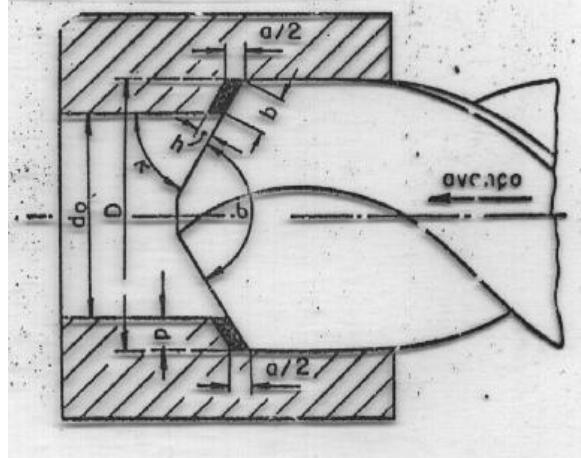

geometria e cinemática dos processos de furação; fresamento e torneamento

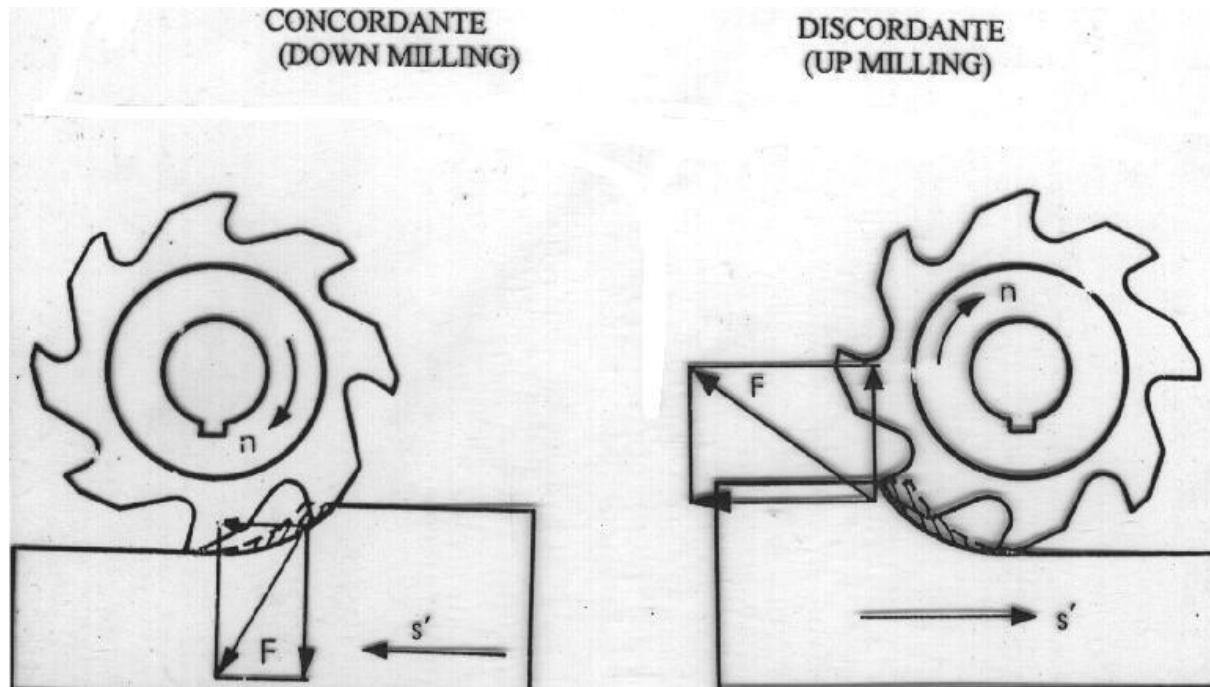

furação

FURAÇÃO COM PRÉ-FURO
Fonte: D. Ferraresi

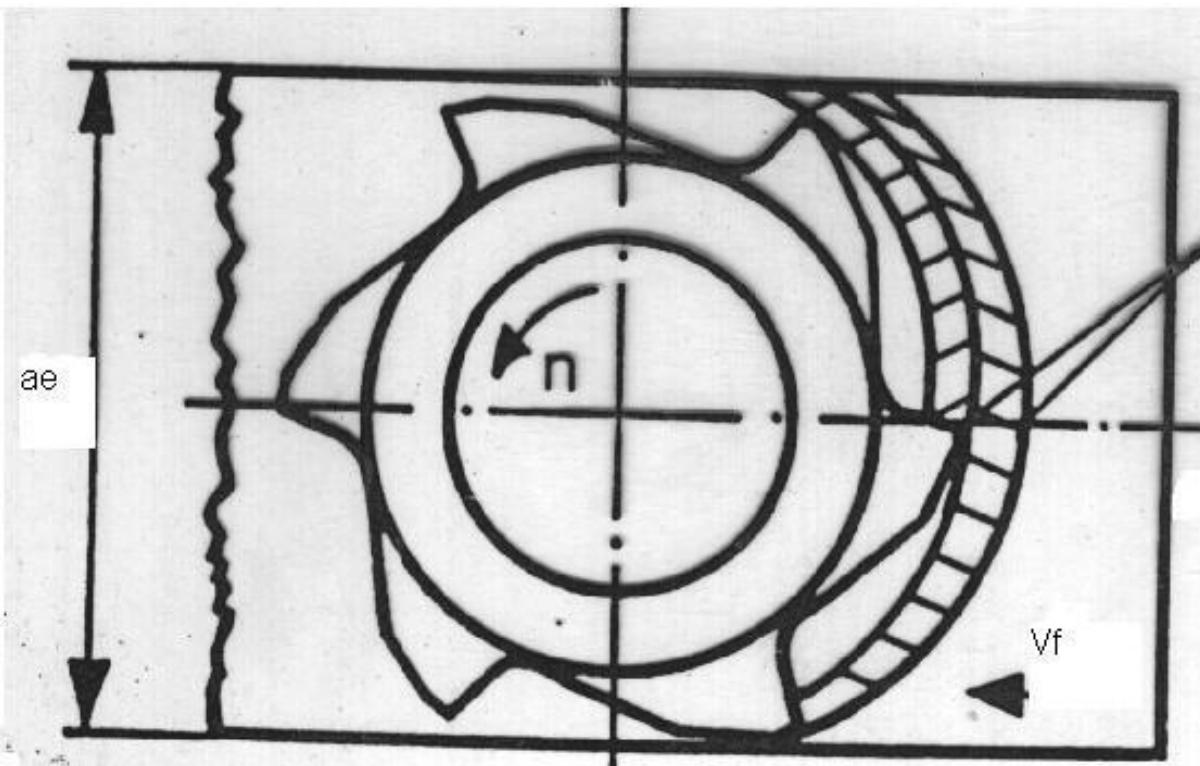

Fresamento periférico

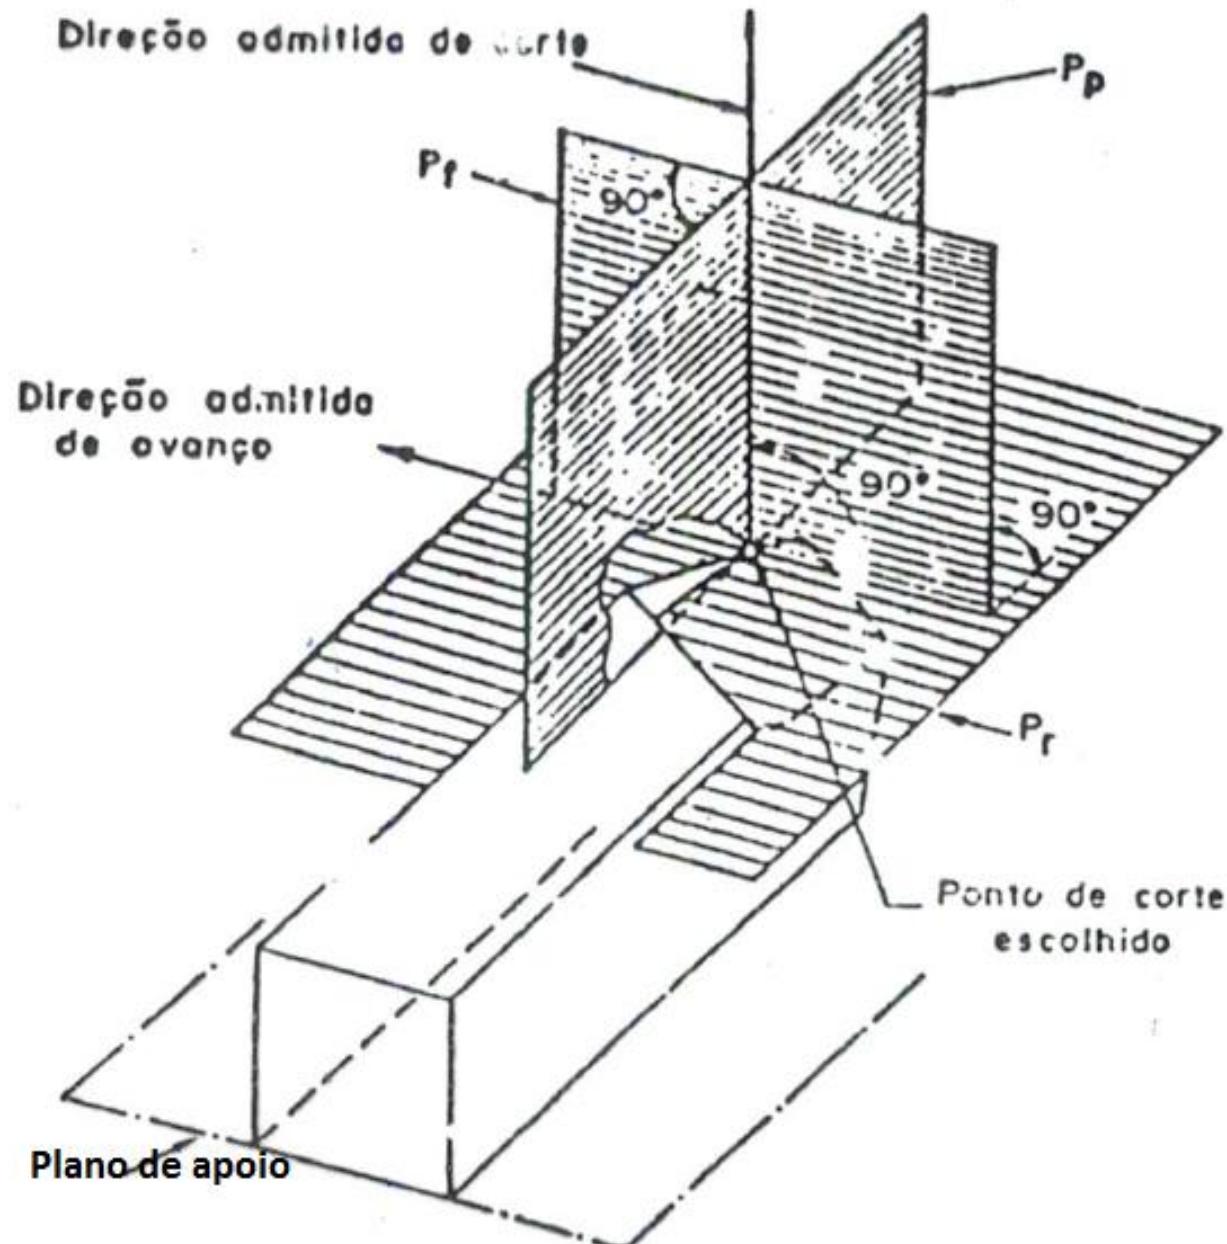

FRESAMENTO PERIFÉRICO (TANGENCIAL)
Fonte: D. Ferraresi

Fresamento frontal (faceamento)

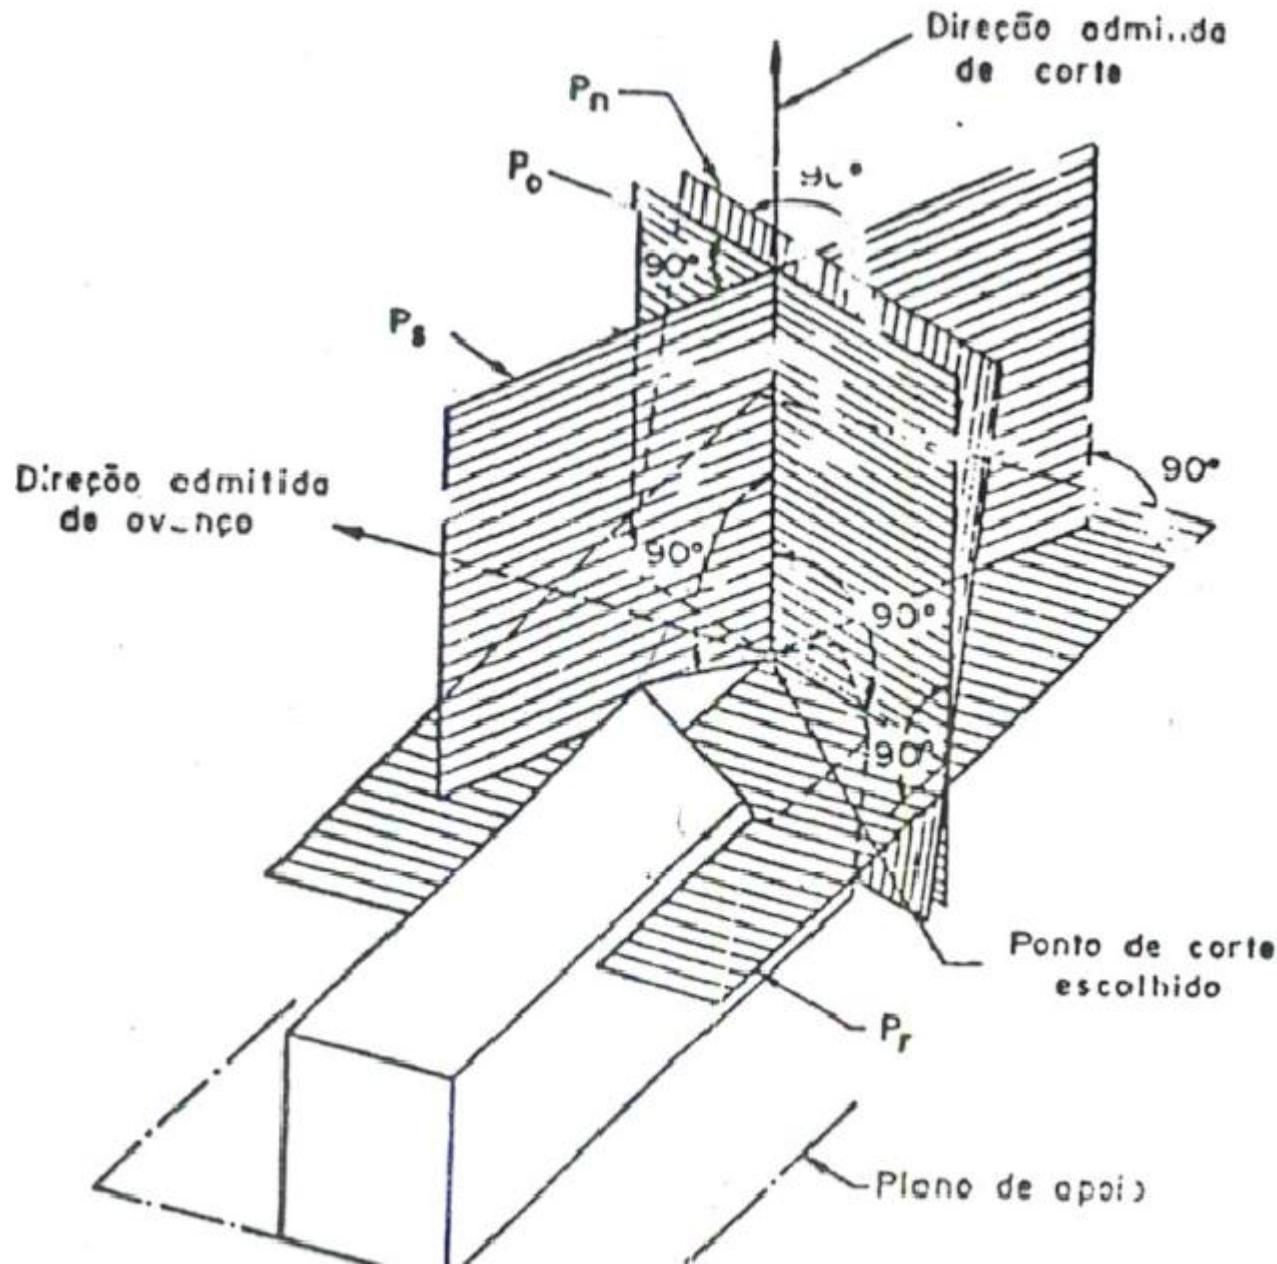

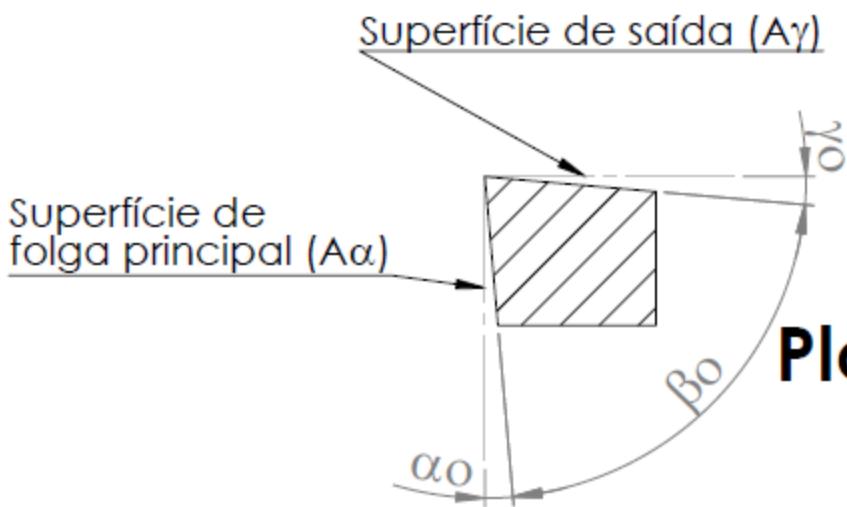

FRESAMENTO FRONTAL - VISTA SUPERIOR
Fonte: Dino Ferraresi

Geometria de ferramenta de corte – 1º triedro - conforme NBR6163

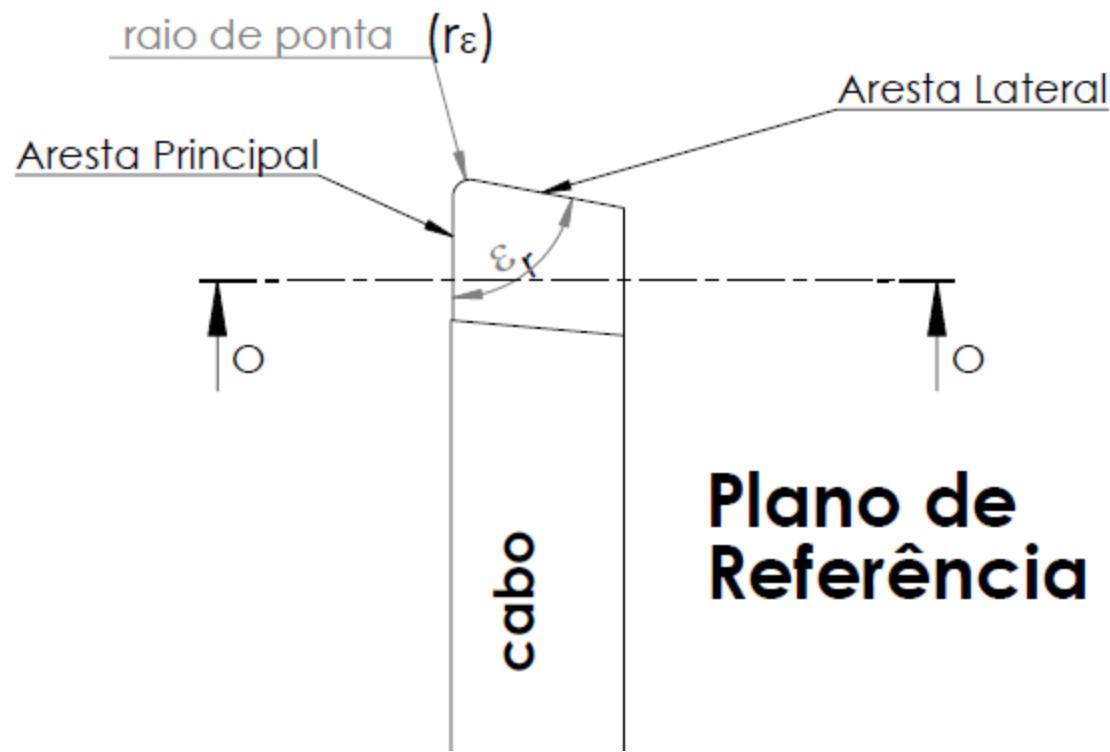

Geometria de ferramenta de corte – 2º triedro - conforme NBR6163

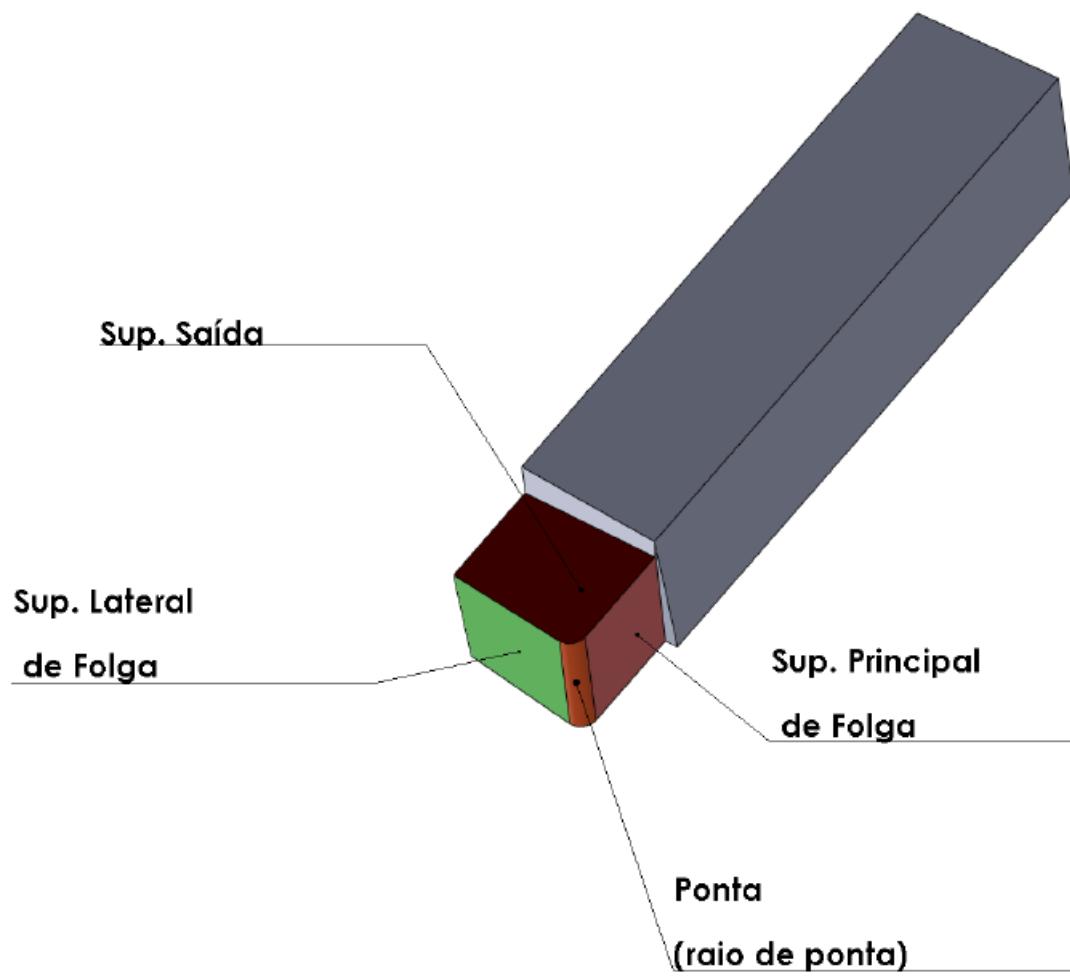

Plano Ortogonal (Po) [seção O-O]

Plano de Referência (Pr)

Para maiores informações sobre geometria das ferramentas de corte, consultar:

1 -Ferramentas de corte : ferramentas simples de tornear – E. G. Stemmer

Ed. da UFSC, 1989 – tombo UFPR {621.94 S825}

2 - ISO 3002-1:1982 Basic quantities in cutting and grinding

Part 1: Geometry of the active part of cutting tools

General terms, reference systems, tool and working angles, chip breakers
